

Dominik Matter

Partner & BD

Economist and Econometrician
lic. oec. publ.

Between 1995 and 2001 Dominik Matter studied economics at the University of Zurich, specialising in econometrics/empirical research. During his studies he worked for a local investment company, designing and implementing various databases.

After completing a Master's degree in economics, he worked as an analyst and project manager for Wüest & Partner AG, a real estate consultancy in Zurich. Apart from the quantitative analysis of the Swiss real estate markets, he implemented various forecast models based on empirical data. He advised several cantonal tax authorities on the use of market data to improve determination of real estate taxes. In his free time he studied statistical data mining.

He has been working with Fahrländer Partner since September 2006. He is a partner and Vice Chairman of the Board of Directors.
